Simplest ranger turret to build

From GMod Wiki

Here you can build a very easy working turret with a ranger.

Recommended:

Smartsnap

What you will need:

Latest Wiremod & Latest Phx

Items Needed:

Flat round object from Phx (will get name later) Flat square object from Phx (will get name later)

Step 1:

Easy weld the round object to the ground/floor as a base.

Step 2:

Using your motor tool motor weld the square object (upright) to the centre of the base) using your own settings for torque, friction.

Step 3:

Place a wire turret about chest hight in the upright square item and put a ranger just below it

Step 4:

Wire the ranger to the turret

Hey Presto you have yourself a a turret which you can control by using the motor keys to make it spin to your target and when the ranger picks up your target, the turret will shoot it.
